AcrylSeal Acrylic and Gel Nail Sealant

- **Air dry** formula provides a permanent seal over all artificial nails ready for nail colour
- Use polish removers on colours applied over AcrylSeal without enhancement damage
- Designed for clients constantly exposing their nails to chemicals, detergents and water

AcrylSeal has been shown to successfully prevent lifting and discolouration especially for clients whose lifestyle is particularly hard on enhancements. Removing nail polish colours from enhancements can mean damage to the nails if the acrylics or gels are not sealed properly. AcrylSeal completely removes this risk by providing a fast, air dry finish to enhancements. Your clients can freely change nail colour as often as they like without having to worry about the acrylic nails or gels underneath. AcrylSeal dries to a clear high gloss, "gel look" finish.

INSTRUCTIONS FOR USE

DO NOT apply AcrylSeal to natural nails or over nail polish.

Once the acrylic or gel application is complete, ensure the nails are completely clean and dry by removing all traces of dust, cuticle oil, hand cream etc. Then apply a base coat of AcrylSeal to the entire nail surface including the nail grooves and the free edge. To finish, apply nail colour and Nailbiz SuperDry 45 top coat. Nail polish remover will not remove the seal when your client wishes to change colours.

To remove, simply buff off during normal infill. The complicated chemical formula of AcrylSeal means the product may thicken when exposed to the air for long periods. Keep the cap on tightly and use AcrylSol to thin.

AcrylSol Product Reviver for AcrylSeal

AcrylSol is a thinning agent specifically formulated to extend the life of your AcrylSeal sealant. Extended exposure to air will cause AcrylSeal to thicken reducing it's effectiveness and workability.

INSTRUCTIONS FOR USE

Using an eye dropper or similar, simply add a couple of drops of AcrylSol and mix well to ensure you get the most value from every bottle of AcrylSeal you use.

Available in 15ml bottles with cap and brush.
