## Gone Away™ Antimicrobial Antifungal Treatment

- Contains natural Thymol solution
- Premium formula for the treatment and prevention of fungal and bacterial nail infections
- Effective in removing stubborn nail stains

*Thymol has long been known as a potent antibacterial and antifungal agent and has even been known to be used as a preservative in ancient Italy to protect art works and manuscripts after flooding and even preserve mummies in ancient Egypt!*

*Bacterial and fungal infections of your clients nails are unsightly and at times difficult to treat. With Gone Away™, treatment becomes far simpler and highly effective. Supplied in a child safe package with a brushed cap, Gone Away™ will help you provide solutions to your clients seemingly untreatable nail disorders.*

### INSTRUCTIONS FOR USE

***Restores the appearance of healthy nails. Sanitizes and dehydrates eliminating the environment necessary for the growth of mold and bacteria. Yellow, brown or green discoloration at the nail tips and spreading down towards the cuticle are a hallmark of this condition. Thymol is a time honored formulation used by dermatologist to treat these types of nail infections. Treatment is successful when the changing nail color no longer continues to extend toward the cuticle. Old infected nail must grow out and this may take 6-12 months. Continue treatment with Thymol throughout this time. Apply one to two droplets twice a day under nail plate. Minimize water contact with nails. Discontinue use of artificial nail tips if wearing them. Signs of inflammation, pain, lumpiness, black color change, or pus coming from the cuticles are all reasons to see your physician.***

***Remove your clients nail coatings and have them apply Gone Away™ twice daily to clean cuticle areas and nail grooves for 2 weeks. Saturate the affected areas using this regime until nails are free of signs of infection. Applying treatments to coloured or treated nails may increase the treatment time to 4 weeks or more. The treatment time will depend on the severity of the infection and compliance with the treatment regime.***

**Available in 15ml private label bottle with salon quality brush or the innovative FLOPEN® packaging for convenience and safety.**
