

# Liquid Crystals: World First for Local Market

## #250 Series brand new to Australian Nail Industry

Fresh from their launch to the cosmetics industry in Europe and the US, these new colour effects are now available to the Australian market through Lumineye Nailcraft Innovations. Using very fine particles of coated glass, these shimmers have fantastic sparkle without the large quantities of material and particle sizes needed previously to get the same effect. This means a truly sparkling, high glitter-like effect with a beautifully clear, high gloss finish. Available from Lumineye are 11 colours across the spectrum containing Silver, Gold, Copper and Blue effects that put the stars at your fingertips.

- New generation colour effects, available for the first time in Australia
- Delivering high brilliance and gloss with pure and vivid colours for all seasons
- Includes dramatic silver, gold, copper and blue star like sparkle with colourful highlights.
- #255 a new French sensation with silver and gold effects in the same colour
